

Lambrice

Positive effect that the UBUNTU family had influence in my life, the enable me to understand that I can succeed if others have succeeded in similar situations it's means I can do it.

The ability to identify the type of information I need to share and to listen especially from the people in my community.it help me to know the risk of sharing fake news, like verifying where, when,who and what the information is all about. An the most important part of it is that" I am someone because of someone else" that reminds me to always promote peace in my community by my peaceful conduct. Above all more grace to CHANGE COMMUNICATION.....
