

**Majolie**

Change commutation a way to bring light in darkness ,a way to overcome challenges, change communication a solution for the refugees , a means to help the poor , brother, sisters , mother , father's let us joined our hands for a brother future through change commutation Ubuntu Ubuntu peace is our way and motor

I was always so blurred when peaceful coexistence is mentioned. Getting to know about change Communications through we had, i was thought the true meaning, how it can be exercised, and the dangers conveyed by lack of peace in families and the society as a whole

I also learnt about hate speeches and how they can easily destroy a long built relationships. Gleaned a lot from the aspect of fake information, how it can be evicted and how you can treat unverified information.

The amazing part about all of this is the whatsapp group that was created in line with the project, it's worth mentioning the fact that, the interactions there are so friendly taking into consideration the little excercise we take and get rewarded.

Thanks Change Communications. You are making a very great effort to bring back the lost light.
